

## UC Water Annual Retreat III

### Poster presenter guidelines

This year's theme is "Integration in water resources research." Your poster presentation will be most beneficial to advancing UC Water's program if you include integration of multiple perspectives through collaborative research and purposeful engagement with decision-makers.

This year we are dedicating a lot of time to poster presentations. There are two components:

- A. Poster session: You will have a 4' x 4' space in which to hang your poster. There will be two posters per board.  
*Please let us know if you need to be placed near your colleague to encourage the integration.*
- B. Elevator talk: In a session preceding the open poster session, you will be given the floor for a brief introduction to your work, no longer than four minutes.

We will have poster judges and there will be small prizes. Check the box when you register if you would like to be included the poster competition.

We encourage you to frame your work within water security and sustainability contributions, focusing on forward-looking aspects, larger needs, and their research successes and challenges. Big questions like, "how will this work get into practice? And how can we best share this research?" should be included.

As always, your inclusion of information, institutions, and infrastructure will enrich UC Water discussion.

Please bring your printed poster to the meeting for setup on Thursday, Sept. 21.

If you want to have your poster printed, please contact Leigh by 9/15.
